

SHWETAM MODI

Business Analyst | Insurance (P&C, Life & Annuity) | B2B/B2C E-Commerce | BRD · PRD · FRD | API Integration | AI-Assisted Analysis | Agile Delivery

+91 89623 90228 | shwetammodi@gmail.com | linkedin.com/in/shwetammodi | Bengaluru, India

PROFESSIONAL SUMMARY

Business Analyst with 12+ years of professional experience, including 10+ years in enterprise software delivery, specialising in the Insurance (Property & Casualty, Life & Annuity) and B2B/B2C E-Commerce domains. Hands-on expertise in requirements gathering and elicitation, Business Requirement Documents (BRD), Product Requirement Documents (PRD), Functional Requirement Documents (FRD), business rules analysis, process flows, and API integration requirements across Agile and quarterly release cycles.

Six years of insurance domain delivery at DXC Technology across Policy Administration Systems (PAS) — Assure Billing and Assure Policy (Property & Casualty) and wmA (Life Insurance & Annuity) — covering business requirement scoping with business analysts, policy and billing workflow analysis, screen-level functional specification, release readiness, and business process improvement. LOMA 280 certified in insurance principles.

Two years of B2B/B2C e-commerce platform delivery at Kibo Commerce, analysing commerce workflows, product and order journeys, and API integration requirements in partnership with product owners and engineering teams. Authors PRDs specifying API behaviour, endpoint contracts, and developer integration instructions for REST/JSON services.

ISTQB Foundation Level certified, with practical exposure to API validation against specification, JSON/XML payload and structured data analysis, MongoDB data structures, and UAT support. Experienced in stakeholder management across distributed business and technical teams in India, the US, and Japan, using JIRA, Confluence, GitHub, and MS Visio.

Applies Generative AI and LLM tooling across the requirements lifecycle — accelerating BRD and PRD drafting, extracting business rules from legacy documentation, generating acceptance criteria and test scenarios, and running consistency and gap checks across specification sets — alongside documentation and process automation to reduce manual analysis effort.

DOMAIN EXPERTISE

Insurance (6 years): Property & Casualty (P&C), Life Insurance, Annuity, Policy Administration Systems (PAS), premium billing workflows, policy servicing and lifecycle processes, insurance product releases, LOMA 280 — Principles of Insurance. Platforms: Assure Billing, Assure Policy, wmA.

E-Commerce (2 years): B2B and B2C commerce platform delivery, product and catalogue workflows, customer journey analysis, commerce API integrations, self-service and support experience, SEO-driven content architecture, Agile release delivery. Platform: Kibo Commerce.

IoT, Edge & Cloud (current): IoT device platforms, Edge Applications, AWS cloud services and network architecture, developer-facing API programmes, engineering standards definition.

AI & AUTOMATION CAPABILITIES

GenAI Tools: ChatGPT, Claude, Microsoft Copilot, Google Gemini, GitHub Copilot — applied to requirements drafting, document analysis, and review cycles

AI-Assisted Business Analysis: BRD/PRD/FRD first-draft generation, business rule extraction from legacy documentation, requirement de-duplication and consistency checking, acceptance criteria and test scenario generation, meeting-note to requirement conversion, gap analysis support

Prompt Engineering: Structured prompting for requirement summarisation, specification QA, terminology standardisation, and stakeholder-ready content generation

Process & Documentation Automation: Doxygen, Sphinx, template-driven specification generation, reusable requirement templates, automated reference generation from source code

AI Delivery Awareness: AI-assisted development workflows, prompt and output quality review, terminology and consistency governance across AI-generated deliverables

CORE COMPETENCIES

Business Analysis | Business Requirements | Requirements Gathering | Requirements Elicitation | Requirements Analysis | BRD | PRD | FRD | Business Requirement Document | Product Requirement Document | Functional Specifications | Business Rules Analysis | User Stories | Acceptance Criteria | Process Flow Documentation | Business Process Improvement | Current State & Future State Analysis | Gap Analysis | Impact Analysis | Business Stakeholder Management | Stakeholder Coordination | Data Analysis | Data Mapping | Structured Data (JSON / XML) | REST API Requirements | API Specification | API Integration | API Testing Support | UAT Support | Defect Coordination | Requirements Traceability | Agile | Scrum | Sprint Planning | Release Management | Policy Administration Systems (PAS) | Property & Casualty Insurance | Life Insurance & Annuity | Premium Billing | B2B E-Commerce | B2C E-Commerce | Commerce Platform | Knowledge Management | Team Leadership | Generative AI | GenAI | AI Tools | LLM | AI-Assisted Requirements | AI-Assisted Documentation | Prompt Engineering | ChatGPT | Claude | Microsoft Copilot | GitHub Copilot | Intelligent Automation | Process Automation | Documentation Automation | AI Adoption

TECHNICAL SKILLS

Business Analysis: BRD, PRD, FRD, Functional Specifications, Requirements Elicitation & Analysis, Business Rules, Process Flows, Current/Future State Analysis, Gap Analysis, Acceptance Criteria, UAT Support, Requirements Traceability

Domains: Property & Casualty Insurance, Life Insurance & Annuity, Policy Administration Systems (PAS), B2B/B2C E-Commerce, IoT & Edge Computing, Cloud (AWS)

API & Integration: REST API requirements, PRD-level API specification, OpenAPI/YAML, JSON & XML payload analysis, endpoint contract definition, API validation, Postman, Swagger-style documentation

Data: MongoDB, structured data analysis (JSON/XML), data structure documentation, MS Excel

Testing & Quality: ISTQB Foundation Level (CTFL), API testing support, specification validation, peer review, defect coordination

Tools & Platforms: JIRA, Confluence, SharePoint, GitHub, Git, MS Visio, HelpJuice, KnowledgeOwl, Adobe FrameMaker, XML DITA, Snagit

Delivery: Agile, Scrum, sprint-based delivery, quarterly release cycles, distributed/offshore stakeholder coordination

AI & Automation: Generative AI / LLM tooling (ChatGPT, Claude, Microsoft Copilot, Gemini, GitHub Copilot), prompt engineering, AI-assisted requirements drafting and review, documentation automation (Doxygen, Sphinx)

Web: React.js, HTML, CSS, JavaScript (working knowledge)

PROFESSIONAL EXPERIENCE

Capgemini India Pvt. Ltd. | Sep 2024 – Present

Business Analysis & Requirements — IoT, Edge & Cloud Platform

Client: Sony India Software Centre (SISC) — Bengaluru, India

Domain: IoT Devices, Edge Computing, Cloud Platform (AWS)

- Elicit and consolidate business and product requirements from developers, architects, and product owners for IoT and edge computing product releases.
- Author Product Requirement Documents (PRDs) specifying API behaviour, endpoint contracts, and developer integration instructions for platform and device APIs.
- Conduct current-state versus future-state analysis of engineering and design standards, benchmarking Google and Microsoft practice to define Sony's internal guidelines, now adopted across teams.
- Analyse and specify cloud architecture requirements covering Edge Applications, AWS services, and cloud network components in partnership with development teams.
- Evaluate and recommend tooling (Doxygen, Sphinx) to automate reference generation from C/C++ source, reducing manual effort across release cycles.
- Define and roll out SOPs and standards that streamline delivery processes, support the Japan-based engineering group, and shorten onboarding for new joiners.
- Coordinate requirement and review cycles across distributed India and Japan stakeholder groups, resolving ambiguity ahead of release sign-off.
- Apply Generative AI and LLM tooling across the requirements cycle — first-draft BRD/PRD generation, business rule extraction from existing specifications, and automated consistency checks — reducing specification turnaround time and manual review effort.
- Govern quality and terminology consistency of AI-generated requirement content before stakeholder circulation, ensuring accuracy against source technical input.

Kibo Commerce | Jan 2023 – Jul 2024

Business Analysis & Product Requirements — B2B/B2C E-Commerce Platform

Domain: B2B and B2C E-Commerce / Commerce Platform

- Gathered business requirements from product owners and engineering teams across Agile release cycles for a B2B and B2C commerce platform serving enterprise retail clients.
- Authored PRD-level API specifications covering endpoint behaviour, request/response contracts, and integration instructions for commerce REST services, maintained in YAML.
- Analysed commerce workflows and customer journeys with product and engineering stakeholders, identifying friction points and recommending product simplifications that reduced end-user dependence on written instructions.
- Reviewed JSON request/response structures and validated endpoint behaviour against documented business requirements with development teams.
- Restructured the customer-facing self-service knowledge architecture in HelpJuice and KnowledgeOwl, improving findability and reducing repeat support contact.
- Managed requirement and specification repositories, branching, and pull request workflows in GitHub aligned to sprint and release schedules.
- Co-authored the company-wide standards guide, aligning business terminology and product vocabulary across B2B and B2C channels.

UST Global | Jan 2022 – Jan 2023

Business Analysis & API Requirements — Enterprise Client Engagements

Domain: Enterprise Client Delivery

- Gathered and documented client-facing business and product requirements for enterprise engagements, working directly with client-side stakeholders.
- Specified REST API requirements in YAML and validated endpoint behaviour against documented business requirements prior to release.
- Managed GitHub branching and merge workflows supporting scheduled requirement and specification releases.
- Collaborated with engineering teams to improve product usability and reduce operational overhead for end users.

DXC Technology | Jul 2016 – Jan 2022

Business Analysis & Requirements — Insurance Platforms (P&C, Life & Annuity)

Domain: Property & Casualty Insurance, Life Insurance & Annuity — Policy Administration Systems (PAS)

Platforms: Assure Billing (P&C) · Assure Policy (P&C) · wma (Life Insurance & Annuity)

- Authored and analysed Business Requirement Documents (BRDs) in direct collaboration with business analysts, scoping new release features across multiple insurance platforms.
- Partnered with business analysts and project teams of up to 20 members to define and validate release scope for the wma life insurance and annuity platform.
- Analysed and specified screen-level processing and UI workflows across policy administration modules, translating system behaviour into business-readable functional specifications.
- Analysed premium billing and policy servicing workflows across Assure Billing and Assure Policy, supporting release scoping and business process clarification for P&C products.
- Specified JSON and XML structured data supporting API and installation requirements; maintained source definitions consumed by downstream generation tooling.
- Documented MongoDB database structures end to end, covering installation, server setup, and environment-specific configuration.
- Led a business process rationalisation initiative that reduced a 1,000+ page platform reference by 50% through duplication analysis and information redesign.
- Managed and maintained 50+ platform specification sets per quarterly release cycle, tracking changes against release scope and meeting 100% of delivery deadlines.
- Led a team of 2 analysts delivering 3–4 new 200+ page specification sets per quarterly release within an Agile delivery model.
- Standardised previously undocumented business procedures and built reusable specification templates, reducing rework on every subsequent release.

EARLY CAREER

- **Insurance Sales Agent (Part-time)** — Star Health Allied Insurance (Jun 2012 – Oct 2012): Advised customers on health insurance products, explained policy terms, and resolved policy queries — first exposure to the insurance domain.
- **Direct Sales Trainee** — Vodafone Essar Spacetel Ltd. (Oct 2015 – Jun 2016): Generated corporate sales leads, exceeding monthly targets by 150%+.
- **Justdial Ambassador** — Justdial Ltd. (Apr 2014 – Oct 2015): Led daily client meetings and supervised 8 sales associates.
- **Relationship Manager** — Religare Securities Ltd. (Dec 2013 – Mar 2014): Managed investment portfolios and an 8-person sales team.

EDUCATION

- **MBA — Marketing & Finance** — Devi Ahilya Vishwavidyalaya (DAVV), Indore | 2013
- **B.Sc. — Computer Science & Microbiology** — Devi Ahilya Vishwavidyalaya (DAVV), Indore | 2010

CERTIFICATIONS

- LOMA 280 — Principles of Insurance (FLMI Level 1)
- ISTQB Foundation Level (CTFL) — International Software Testing Qualifications Board
- Data Science with R — in progress

KEY ACHIEVEMENTS

- Reduced a 1,000+ page insurance platform reference by 50% through duplication analysis and restructuring, cutting maintenance effort across every subsequent release.
- Met 100% of quarterly release deadlines across six years of insurance platform delivery at DXC Technology.
- Defined Sony's internal engineering and design standards by benchmarking industry practice; adopted across engineering teams.
- Delivered 300+ requirement and specification documents across insurance, e-commerce, and IoT platforms.
- Led and mentored a 2-member team while coordinating business and technical stakeholders across India, the US, and Japan.
- Introduced Generative AI tooling into the requirements workflow, cutting first-draft turnaround on specification deliverables while maintaining accuracy and terminology consistency.
